access the self-achievement. The self-achievement is not included in the instructor resources however, instructions on how to complete the process are included below and attached as a downloadable pdf. This is a sample, not an exact replication of the Carpentry student achievement self evaluation.

Upon completion of the PACT Carpentry course, students will understand and be able to perform the skills in cutting, shaping and installation of building materials during the construction of residential buildings.

This learning path includes instructor resources, the student workbook and the knowledge check the student must pass to access the self-achievement. The self-achievement is not included in the instructor resources.

The student learning path contains a knowledge check aligned to the Student Achievement Records that must be passed with a 70% or higher score in order to achieve proficiency. Instructors will evaluate proficiency of performance-based learning objectives following the Student Achievement Self-Evaluation in order for the student to earn a certificate.
